BOX AMENDMENT
Commissioner for Patents
Washington, D.C. 20231

RESPONSE TO NOTICE OF NON-COMPLIANT AMENDMENT

Dear Sir:

In response to the Notice of Non-Compliant Amendment dated September 16, 2002,
Applicant submits the following replacement paragraphs as set out in 37 CFR 1.121(b)(1)(ii)

IN THE SPECIFICATION:

Please replace the following paragraph beginning on page 5, line 20 to page 6, line 7 with
the following paragraph. The marked up copy of the paragraph follows this response.

C'
A bag suitable for use in the method is constructed or obtained as described with respect
to Figure 1. In a large-scale manufacturing facility in which a detergent composition is being
produced, a large sample of detergent particles being dried in a fluid bed dryer is taken at the
inlet of the dryer and riffled down to five 20 gram samples. The bags are constructed of material
composed of 100% 28 gauge aluminum foil on the inside (for sterile/inert cavity) and 48 gauge
polyethylene on the outside (for strength). The bag material is cut into a 100 cm by 35 cm
rectangle and folded with the aluminum on the inside. The sides of the bag are folded with two
approx. 6 mm folds and the open end is folded on both sides with 10 mm folds until there is only
approx. a 40 mm opening left resulting in a angled/cone shaped appearance. All folds are then
sealed with high strength/high temperature fabric or duct tape leaving only the 40 mm opening
unsealed. Each of the five 20 gram samples are poured into separate bags as shown in Figure 1.
